Office Data Storage Server

GANSAN IT TECHNOLOGIES PVT LIMITED

Sooner or later, your office will need more space for data storage. Information in the form of e-mails, documents, presentations, databases, graphics, audio files and spreadsheets is the lifeblood of most organisat, and the applications that run and protect your business require a lot of disk space. Storing information and managing its storage is critical to a organisation's behind-the-scenes success.

Don't wait until you need more storage before deciding what to do. Start planning now for your future storage needs, so you won't waste time and money later.

GANSAN IT brings fast, simple, reliable access to data in an IP networking environment. Its solution is suitable for small and mid-sized businesses needing large amounts of economical storage that multiple users can share over a network. And given that many offices lack IT departments, the solutions are easy to operate, centrally manage and consolidate the data generated in the office.

GANSAN Office Data solution comes with following features.

1. Can be configured to use various RAID level for data redudancy.
