

Windows to Linux Migration Services.

Gasan IT Technologies Pvt Ltd has special love and affection towards Linux and other Opensource Operating-Systems. Linux has today become a strategic, efficient and reliable platform for business systems at many small, medium to big companies. A very larger percentage of servers powering the Internet run on a Linux-based operating system including tech giants like IBM, Google, Oracle, Yahoo & Amazon., etc.

But in reality everyone around us uses Windows for different reasons:

- a. Windows OS (operating system) comes as the default OS on their PC (personal computer).
- b. Users grew up with different versions of the Windows OS, so it's difficult to change.
- c. Most people think Windows is the only alternative for their desktop PC. Aside from the Mac OS, they are not exposed to more alternatives.

Windows is well designed and convenient. It allows you to perform many tasks easily and is updated regularly. Then why use Linux ?? What are compelling reasons to switch to Linux ???

Advantages of Linux :

1. **Zero Licencing Cost** : Linux is free and open source Operating System. Linux means saving everywhere.
2. **There no number of users restrictions** if you use Linux. Can any one imagine with Windows ?
3. **Extremely stable** : Linux systems are widely known for their stability and reliability, many Linux servers on the Internet have been running for years without failure or even being restarted. In Linux, you can modify a system or program configuration file and effect the changes without necessarily rebooting the computer, which is not the case with Windows.
4. **User friendly** : Today Linux is a simple and very user friendly. If you are using Android smart phone, you have seen how simple it is. By the way Android is also

based on Linux.

5. Linux is without doubt the **most secure** kernel out there, making Linux based operating systems secure and suitable for every one.

6. Linux is so **powerful and flexible**. You can tune it to meet you needs: it allows you to do whatever you want. Its not possible with Windows.

7. Linux has a **rock-solid support** for a mix of computer architectures, on both modern and moderately old hardware. This is one of the most significant factors that make Linux better than Windows , that is if you have a small budget for hardware acquisition.

8. **Free Application Software** : All the necessary softwares like office suite, email client, browser, graphic applications, are free to use.

9. So far, Virus on Linux is unheard. Hence you need not have to invest in purchasing **Anti-Virus. Its not needed.**

10. Office Suite on Linux are capable of **reading and writing in Microsoft format**. Hence word, spreadsheet and presentation file you have created are readable and writable on windows machines as well.

11. **In most of the cases, drivers are not required.** Linux recognises and adapt itself to the most of the hardware automatically, when connected.

12. **Application Installation** : Applicaton installation is far more easy on Linux.

13. Linux is updated on day-to-day basis. **Updates are also free.**

14. With Linux, you require **less hardware resources** as compared with Windows.

Gansan IT's role :

1. Identifying the use case.
2. Installing Linux on Customer's computers. Migrate earlier data.
3. Training for new users.
4. Support.
